Polyester Polymer Concrete ...
Concrete is a composite material
composed of fine and coarse
aggregate bonded together with a
fluid cement (cement paste) that
hardens over time. Most
concretes used are lime-based
concretes such as Portland
cement concrete or concretes
made with other hydraulic
cements, such as calcium
aluminate cements. However,
asphalt concrete, which is
frequently used for road surfaces,
is also a type of ... Tue, 22 May

GRP Pipes & Fittings
GRP Pipes & Fittings - A pipe is a tubular section or

hollow cylinder, usually but not
necessarily of circular
cross-section, used mainly to
convey substances which can
flow liquids and gases (
slurries, powders and masses of
small solids. It can also be used
for structural applications; hollow
pipe is far stiffer per unit weight
than solid members. In common
usage the words pipe and tube are
usually ...
