on Chemical Compounds - Mark
Bishop - In chemistry, an ionic
compound is a chemical
compound composed of ions held
together by electrostatic forces
termed ionic bonding. The
compound is neutral overall, but
consists of positively charged
ions called cations and negatively
charged ions called anions. Sun,

Colgur - An ion (/ E^a ETM n, -
E' n /) is an atom or molecule that
has a non-zero net electrical
charge (its total number of
electrons is not equal to its total
number of protons). A cation is a
positively-charged ion, while an
anion is negatively charged. Sat,
